INDEX OF SUBJECTS

Abelmoschus esculentus, see Okra

Age of palm and planting density effects on the partitioning of assimilates in oil palm (*Elaeis guineensis*) (Breure), 53

Agricultural Extension Worldwide, ed. by W. M. Rivera and S. G. Schram, reviewed by T. Harding, 494

Agriculture and Human Values, ed. by R. P. Haynes, reviewed by Joyce Tait, 268

Agroforestry – a Decade of Development, ed. by H. A. Steppler and P. K. R. Nair, reviewed by M. G. R. Cannell, 393

Arachis hypogaea, see Groundnut

Assimilates in oil palm (*Elaeis guineensis*) and their partitioning as affected by palm age and planting density (Breure), 53

Azolla pinnata growth and nitrogen fixation and the yield of rice as affected by phosphorus and carbofuran (Singh and Singh), 183

Bean (*Phaseolus vulgaris*) and the evidence for yield stability in selected landraces (Ayeh), 367

Botswana and experience of technology development and farmer groups (Norman, Baker, Heinrich and Worman), 321

Brazil and the impact of regular research field hearings (RRFH) in on-farm trials in the northeast (Baker, Knipscheer and de Souza Neto), 281

Breeders' rights, an equitable legal system for new plant cultivars (Mastenbroek), 15

Breeding strategy for rice in rainfed areas of India: improved livelihoods, genetic diversity and farmer participation (Maurya, Bottrall, and Farrington), 311

Burkina Faso and the soil physical properties of tied ridges in the Sudan savannah there (Hulugalle and Rodriguez), 375

Carbofuran and phosphorus and their effects on the growth and nitrogen fixation of *Azolla pinnata* and the yield of rice (Singh and Singh), 183

Cassava and the physiological characteristics for selection (Cock and El-Sharkawy), 443

Cassava in Shifting Cultivation. A Systems Approach to Agricultural Technology Development in Africa, by L. O. Fresco, reviewed by N. W. Simmonds, 265

Cassava, yam and edible aroids – the storage of tropical root and tuber crops (Cooke, Rickard and Thompson), 457

Cattle and forage tissues' and soil's mineral status in the middleveld of Swaziland (Ogwang), 177

Classification of farm systems in a hierarchical form (Fresco and Westphal), 399

Clonal black CTC teas in Kenya and the effects of geographical area of production on the composition of their volatile flavour compounds (Owour, Tsushida, Horita and Murai), 227

Cloves and the causes of their irregular production in the islands of Zanzibar and Pemba (Martin, Butler and Dabek), 105

Coffee, ed. by R. J. Clarke and R. Macrae, reviewed by A. K. Thompson, 397

Colocynthis vulgaris, see Melon

Computer Application in Agricultural Environments, ed. by J. A. Clarke, K. Gregson and R. A. Saffell, reviewed by C. D. Watt, 395

Cottonseed lint, seed, protein and oil yields, and oil properties as affected by the concentration and time of application of the defoliant Harvade (Sawan, Hefni and Allam), 123

Crop production from smallholder producers, a review of measuring methods (Poate), 1

Cultivars, new, and plant breeders' rights (Mastenbroek), 15

Cultivars of sorghum and their yields of grain and stover in the post-rainy season as affected by irrigation and date of sowing (Reddy, Seetharama and House), 31

Cultivars of wheat in Turkey and their responses to vernalization and photoperiod (Terzioğlu), 237

Date of sowing and irrigation effects on the grain and stover yields of diverse sorghum cultivars in the post-rainy season (Reddy, Seetharama and House), 31

Defoliant Harvade, the, and the effect of its concentration and time of application on the lint, seed, protein and oil yields, and oil properties of cottonseed (Sawan, Hefni and Allam), 123
Density of planting and its effect on yield trends in oil palm (Breure), 37
Density of planting and palm age effects on the partitioning of assimilates in oil palm (*Elaeis guineensis*) (Breure), 53
Drought response of four genotypes of groundnut (*Arachis hypogaea*) in terms of yield differences, and its physiological basis. I. Dry matter production and water use (Matthews, Harris, Nageswara Rao, Williams and Wadia), 191; II. Solar radiation interception and leaf movement (Matthews, Harris, Williams and Nageswara Rao), 203; III. Developmental processes (Harris, Matthews, Nageswara Rao and Williams), 215

Economics of Integrated Pest Control in Irrigated Rice (The), by H. Waibel, reviewed by G. A. Norton, 491
Edible aroids, cassava and yam – the storage of tropical root and tuber crops (Cooke, Rickard and Thompson), 457
Elaeis guineensis, see Oil Palm *and* Palm
Environmental modulation of flowering in mung bean (*Vigna radiata*): further reappraisal for diverse genotypes and photothermal regimes (Summerfield and Lawn), 75

Farm systems and a hierarchical classification (Fresco and Westphal), 399
Farmer groups and technology development: experience from Botswana (Norman, Baker, Heinrich and Worman), 321
Farmer participation, improved livelihoods and genetic diversity: a strategy for rice breeding in rainfed areas of India (Maurya, Bottrall and Farrington), 311
Farmer participatory research: editorial introduction (Farrington), 269
Farmers and scientists and developing a partnership between them: the example of Zambia's Adaptive Research Planning Team (Kean), 289
Farmers, on-farm research and the development of new technology (Sumberg and Okali), 333
Farmers' Perceptions and Practices. Management of Pests and Pesticides, ed. by Joyce Tait and Banpot Naponpeth, reviewed by P. T. Haskell, 395
Farming systems perspective and its use to strengthen linkages in agricultural research: the role of social scientists (Byerlee and Tripp), 137
Feed the Earth (To): Agro-ecology for Sustainable Development, by M. Dover and L. M. Talbot, reviewed by S. M. Newman, 489
Fertilizer and water management to minimize yield losses of sugarcane when grown with a wheat companion crop (Verma and Yadav), 115
Fibre yield of jute as affected by broadcast and line sowing, a reassessment (Palit, Bhattacharyya and Samanta), 471
Flavour compounds, volatile, in Kenyan clonal black CTC teas and the effects of geographical area of production on their composition (Owour, Tsushida, Horita and Murai), 227
Flowering in mung bean (*Vigna radiata*) and its environmental modulation: further reappraisal for diverse genotypes and photothermal regimes (Summerfield and Lawn), 75
Fodder crops and green manures and their effects on crop yields and phosphorus needs of potato–wheat systems in the north-western plains of India (Sharma, Govindakrishnan, Singh and Sharma), 97
Fodder crops, perennial, and a simple model for a quantitative comparison of their regrowth (Kamidi and Wanjala), 361
Forage and cattle tissues' and soil's mineral status in the middleveld of Swaziland (Ogwang), 177
Forage yields of five tropical grasses on an extremely sodic soil and the resultant soil amelioration long-term (Kumar), 89

Genetic diversity, improved livelihoods and farmer participation: a strategy for rice breeding in rainfed areas of India (Maurya, Bottrall and Farrington), 311
Genetics and Plant Pathogenesis, ed. by P. R. Day and G. J. Jellis, reviewed by W. J Whittington, 396
Genotypes of groundnut (*Arachis hypogaea*) and the physiological basis for the yield differences between four of them in response to drought. I. Dry matter production and water use (Matthews, Harris, Nageswara Rao, Williams and Wadia), 191; II. Solar radiation interception and leaf movement (Matthews, Harris, Wil-

liams and Nageswara Rao), 203; III. Developmental processes (Harris, Matthews, Nageswara Rao and Williams), 215

Genotypes of maize and their yield stability across international environments: full season tropical maize (Crossa, Westcott and Gonzalez), 253

Genotypes of mung bean (*Vigna radiata*) and the environmental modulation of their flowering under diverse photothermal regimes (Summerfield and Lawn), 75

Glycine max, *see* Soyabean

Grain and stover yields of diverse sorghum cultivars in the post-rainy season as affected by irrigation and date of sowing (Reddy, Seetharama and House), 31

Grasses grown on an extremely sodic soil and the resultant soil amelioration and forage yields long-term of five tropical species (Kumar), 89

Green manures and fodder crops and their effects on crop yields and phosphorus needs of potato–wheat systems in the north-western plains of India (Sharma, Govindakrishnan, Singh and Sharma), 97

Groundnut (*Arachis hypogaea*) genotypes and the physiological basis for yield differences between four of them in response to drought. I. Dry matter production and water use (Matthews, Harris, Nageswara Rao, Williams and Wadia), 191; II. Solar radiation interception and leaf movement (Matthews, Harris, Williams and Nageswara Rao), 203; III. Developmental processes (Harris, Matthews, Nageswara Rao and Williams), 215

Growth and yield of the crop and soil temperature and moisture content as affected by intercropping maize with melon (*Colocynthis vulgaris*) (Olasantan), 67

Harvesting patterns and pest damage in okra (*Abelmoschus esculentus*) in relation to the effect of leaf removal on its growth and yield (Olasantan), 449

Herbicides. Volume 6, Progress in Pesticide Biochemistry and Toxicology, ed. by D. H. Hutson and T. R. Roberts, reviewed by A. Walker, 495

India and a strategy for rice breeding in rainfed areas there: improved livelihoods, genetic diversity and farmer participation (Maurya, Bottrall, and Farrington), 311

Intercropping maize with melon (*Colocynthis vulgaris*) and its effects on soil temperature and moisture content and crop growth and yield (Olasantan), 67

Intercropping pigeonpea and rice and the effect of crop geometry (row proportions) on the water balance of the root zone of the system (Jena and Misra), 385

Irrigation and date of sowing effects on the grain and stover yields of diverse sorghum cultivars in the post-rainy season (Reddy, Seetharama and House), 31

Irrigation and the analysis of experiments involving line source sprinklers (Morgan and Carr), 169

Jute and a reassessment of the effects of broadcast and line sowing on its fibre yield (Palit, Bhattacharyya and Samanta), 471

Kenyan clonal black CTC teas and the effects of geographical area of production on the composition of their volatile flavour compounds (Owour, Tsushida, Horita and Murai), 227

Leaf Protein and its By-products in Human and Animal Nutrition, by N. W. Pirie, reviewed by C. R. W. Spedding, 130

Leaf removal and its effect on the growth and yield of okra (*Abelmoschus esculentus*) and its relevance to leaf harvesting patterns and pest damage (Olasantan), 449

Leaf water potential in peanuts: a comparison of thermocouple psychrometer and pressure chamber measurements (Wright, Rahmianna and Hatfield), 355

Legal system for new plant cultivars and plant breeders' rights (Mastenbroek), 15

Line source sprinkler irrigation and the analysis of experiments involving it (Morgan and Carr), 169

Lint, seed, protein and oil yields, and oil properties of cottonseed as affected by the concentration and time of application of the defoliant Harvade (Sawan, Hefni and Allam), 123

Lucerne and sunflower and the measurement of total and osmotic potentials in their tissues using thermocouple psychrometers (Wright and Whitfield), 481

Maize and melon (*Colocynthis vulgaris*) intercropping and its effects on soil temperature and moisture content and crop growth and yield (Olasantan), 67
Maize and the comparative effectiveness of ordinary and coated urea and nitrification inhibitor treated-urea as a source of nitrogen (Prabhakaran Nair and Sharma), 477
Maize genotypes and their yield stability across international environments: full season tropical maize (Crossa, Westcott and Gonzalez), 253
Manures, green, and fodder crops and their effects on crop yields and phosphorus needs of potato–wheat systems in the north-western plains of India (Sharma, Govindakrishnan, Singh and Sharma), 97
Measurements of leaf water potential in peanuts; a comparison of the thermocouple psychrometer and pressure chamber methods (Wright, Rahmianna and Hatfield), 355
Melon (*Colocynthis vulgaris*) and maize intercropping and its effects on soil temperature and moisture content and crop growth and yield (Olasantan), 67
Methods for measuring crop production from smallholder producers, a review (Poate), 1
Middleveld of Swaziland and the mineral status of soil, forage and cattle tissues there (Ogwang), 177
Mineral Nutrition in the Plant–Soil System, by R. J. Haynes, reviewed by K. S. Smith, 131
Mineral status of soil, forage and cattle tissues in the middleveld of Swaziland (Ogwang), 177
Model, simple, for a quantitative comparison of the regrowth of perennial fodder crops (Kamidi and Wanjala), 361
Moisture content and temperature of the soil and crop growth and yield as affected by intercropping maize with melon (*Colocynthis vulgaris*) (Olasantan), 67
Molecular Biology of Plant Growth Control, by J. E. Fox and M. Jacobs, reviewed by J. L. Lenton, 492
Molecular Entomology, ed. by J. H. Law, reviewed by C. Wall, 489
Mung bean (*Vigna radiata*) flowering and its environmental modulation: further reappraisal for diverse genotypes and photothermal regimes (Summerfield and Lawn), 75
Mungbean (*Vigna radiata*) and soyabean (*Glycine max*) growth in the post-monsoon season after upland rice (Shepherd, Gregory, Woodhead, Pandey and Magbujos), 433

Nitrification inhibitor treated-urea and ordinary and coated urea compared as sources of nitrogen for maize (Prabhakaran Nair and Sharma), 477
Nitrogen fixation and growth of *Azolla pinnata* and the yield of rice as affected by phosphorus and carbofuran (Singh and Singh), 183
Nitrogen for maize and the comparative effectiveness of ordinary and coated urea and nitrification inhibitor treated-urea as a source (Prabhakaran Nair and Sharma), 477

Oil, lint, seed and protein yields, and oil properties of cottonseed as affected by the concentration and time of application of the defoliant Harvade (Sawan, Hefni and Allam), 123
Oil palm and the effect of different planting densities on yield trends (Breure), 37
Oil palm (*Elaeis guineensis*) and the effect of palm age and planting density on the partitioning of assimilates (Breure), 53
Okra (*Abelmoschus esculentus*) and the frequency of weeding for optimum growth and yield (Iremiren), 247
Okra (*Abelmoschus esculentus*) growth and yield as affected by leaf removal and their relevance to leaf harvesting patterns and pest damage (Olasantan), 449
On-farm research, farmers and the development of new technology (Sumberg and Okali), 333
On-farm trials in northeast Brazil and the impact of regular research field hearings (RRFH) (Baker, Knipscheer and de Souza Neto), 281
Osmotic and total potential measurement in lucerne and sunflower tissues using thermocouple psychrometers (Wright and Whitfield), 481

Palm age and density of planting effects on the partitioning of assimilates in oil palm (*Elaeis guineensis*) (Breure), 53
Participation by farmers, improved livelihoods and genetic diversity: a strategy for rice breeding in rainfed areas of India (Maurya, Bottrall and Farrington), 311

Participatory method for systems-problem solving research: rehabilitating marginal uplands in the Philippines (Lightfoot, de Guia Jr and Ocado), 301

Partnership development between farmers and scientists: the example of Zambia's Adaptive Research Planning Team (Kean), 289

Peanut leaf water potential; a comparison of thermocouple psychrometer and pressure chamber measurements (Wright, Rahmianna and Hatfield), 355

Pemba and Zanzibar and the causes of irregular clove production in these islands (Martin, Butler and Dabek), 105

Pest Control: Operations and Systems Analysis in Fruit Fly Management, ed. by M. Mangel, J. R. Carey and R. E. Plant, reviewed by H. F. van Emden, 131

Pest damage and harvesting patterns in okra (*Abelmoschus esculentus*) in relation to the effect of leaf removal on its growth and yield (Olasantan), 449

Pesticides on Plant Surfaces, ed. by H. J. Cottrell, reviewed by E. C. Hislop, 491

Phaseolus vulgaris, see Bean

Philippines and the use of a participatory method for systems-problem solving research: rehabilitating marginal uplands (Lighfoot, de Guia Jr and Ocado), 301

Phosphorus and carbofuran and their effects on the growth and nitrogen fixation of *Azolla pinnata* and the yield of rice (Singh and Singh), 183

Phosphorus needs and crop yields of potato–wheat systems in the north-western plains of India as affected by different green manures and fodder crops (Sharma, Govindakrishnan, Singh and Sharma), 97

Photoperiod and vernalization responses of some Turkish wheat cultivars (Terzioğlu), 237

Photothermal regimes and their modulation of flowering in mung bean (*Vigna radiata*): further reappraisal for diverse genotypes (Summerfield and Lawn), 75

Physiological characteristics for cassava selection (Cock and El-Sharkawy), 443

Phytolacca dodecandra *Berries as a Means of Controlling Bilharzia Transmitting Snails*, by Ch. B. Lugt, reviewed by R. C. Carter, 490

Pigeonpea and rice intercropping system and the effect of crop geometry (row proportions) on the water balance of the root zone (Jena and Misra), 385

Plant Analysis, ed. by D. J. Reuter and J. B. Robinson, reviewed by K. Simpson, 129

Plant breeders' rights, an equitable legal system for new plant cultivars (Mastenbroek), 15

Plant Growth Substances 1985, ed. by M. Bopp, reviewed by J. E. Dale, 129

Plant Molecular and Cell Biology, ed. by B. J. Miflin, reviewed by J. A. Roberts, 396

Plant Pathology – Principles and Practices, by D. Gareth Jones, reviewed by G. F. Pegg, 268

Plant Poisoning in Animals, by M. Halls and T. Crane, reviewed by R. H. Phipps, 393

Plant Products and the New Technology, ed by K. W. Fuller and J. R. Gallon, reviewed by E. R. Morris, 394

Plant Tissue and Cell Culture, ed. by C. E. Green, reviewed by P. G. Alderson, 490

Planting densities and their effect on yield trends in oil palm (Breure), 37

Planting density and palm age effects on the partitioning of assimilates in oil palm (*Elaeis guineensis*) (Breure), 53

Potato–wheat systems in the north-western plains of India and the effects of different green manures and fodder crops on their yields and phosphorus needs (Sharma, Govindakrishnan, Singh and Sharma), 97

Pressure chamber and thermocouple psychrometer measurements of leaf water potential in peanuts compared (Wright, Rahmianna and Hatfield), 355

Principles and Practice of Soil Science, by R. E. White, reviewed by P. B. Leeds-Harrison, 267

Protein, lint, seed and oil yields, and oil properties of cottonseed as affected by the concentration and time of application of the defoliant Harvade (Sawan, Hefni and Allam), 123

Rainfed areas of India and a strategy for rice breeding there: improved livelihoods, genetic diversity and farmer participation (Maurya, Bottrall and Farrington), 311

Rangelands: a Resource under Siege, ed. by P. J. Joss, P. W. Lynch and O. B. Williams, reviewed by M. A. Keech, 266

Regular research field hearings (RRFH) and their impact in on-farm trials in north-east Brazil (Baker, Knipscheer and de Souza Neto), 281

Rehabilitating marginal uplands in the Philippines: the use of a participatory method for systems-problem solving research (Lightfoot, de Guia Jr and Ocado), 301

Rice and pigeonpea intercropping system and the effect of crop geometry (row proportions) on the water balance of the root zone (Jena and Misra), 385

Rice breeding strategy for rainfed areas of India: improved livelihoods, genetic diversity and farmer participation (Maurya, Bottrall and Farrington), 311

Rice, upland, and the growth of soyabean (*Glycine max*) and mungbean (*Vigna radiata*) in the post-monsoon season after it (Shepherd, Gregory, Woodhead, Pandey and Magbujos), 433

Rice yield and the growth and nitrogen fixation of *Azolla pinnata* as affected by phosphorus and carbofuran (Singh and Singh), 183

Role of Micro-organisms in Sustainable Agriculture (The), ed. by J. M. Lopez-Read and R. D. Hodges, reviewed by S. B. C. Larkin, 267

Root and tuber crops in the tropics and their storage - cassava, yam and edible aroids (Cooke, Rickard and Thompson), 457

Root Crops Production and Research in the Caribbean: Proceedings of a Regional Workshop held in Guadaloupe, ed. by T. U. Ferguson, reviewed by A. K. Thompson, 265

Root Location of Fruit Trees and its Agro-Technical Consequences, by J. Tamasi, reviewed by D. Atkinson, 396

Root zone water balance of a pigeonpea and rice intercropping system as affected by crop geometry (row proportions) (Jena and Misra), 385

Rural Development for Poverty Alleviation, ed. by M. K. K. Morris, reviewed by B. A. May, 266

Sago-85, ed. by N. Yamada and K. Kainuma, reviewed by N. W. Simmonds, 129

Seed, lint, protein and oil yields, and oil properties of cottonseed as affected by the concentration and time of application of the defoliant Harvade (Sawan, Hefni and Allam), 123

Septoria Diseases of Wheat (The), by Z. Eyal, A. L. Scharen, J. M. Prescott and M. van Ginkel. reviewed by F. G. H. Lupton, 494

Smallholder producers' crop production, a review of measuring methods (Poate), 1

Social scientists' role in strengthening linkages in agricultural research through a farming systems perspective (Byerlee and Tripp), 137

Soil amelioration of an extremely sodic soil as a result of growing five tropical grasses, and long-term forage yields (Kumar), 89

Soil, forage and cattle tissues' mineral status in the middleveld of Swaziland (Ogwang), 177

Soil physical properties of tied ridges in the Sudan savannah of Burkina Faso (Hulugalle and Rodriguez), 375

Soil temperature and moisture content and crop growth and yield as affected by intercropping maize with melon (*Colocynthis vulgaris*) (Olasantan), 67

Sorghums in the post-rainy season. I. Effect of irrigation and date of sowing on the grain and stover yields of diverse cultivars (Reddy, Seetharama and House), 31

Sowing date and irrigation effects on the grain and stover yields of diverse sorghum cultivars in the post-rainy season (Reddy, Seetharama and House), 31

Sowing in lines or broadcast, a reassessment of the effects on the fibre yield of jute (Palit, Bhattacharyya and Samanta), 471

Soyabean (*Glycine max*) and mungbean (*Vigna radiata*) growth in the post-monsoon season after upland rice (Shepherd, Gregory, Woodhead, Pandey and Magbujos), 433

Soybean in Tropical and Subtropical Cropping Systems, by E. W. Sulzberger and B. T. McLean, reviewed by R. W. Radley, 493

Sprinkler irrigation and the analysis of experiments involving a line source (Morgan and Carr), 169

Statistics and what the textbook leaves out. I. Agricultural scientist and statistician (Finney), 153; II. Data handling (Finney), 343; III. Design and analysis (Finney), 421

Storage of tropical root and tuber crops - cassava, yam and edible aroids (Cooke, Rickard and Thompson), 457

Stover and grain yields of diverse sorghum cultivars in the post-rainy season as affected by irrigation and date of sowing (Reddy, Seetharama and House), 31

Success of Peasant Agriculture in Zimbabwe 1980–1985 (The), by D. R. Norman, reviewed by M. A. Keech, 492

Sugarcane Diseases, by A. Sivanesan and J. M.

Waller, reviewed by N. W. Simmonds, 131
Sugarcane varietal mixtures and their performance (Kapur, Bhat and Tripathi), 163
Sugarcane yield losses when grown with a wheat companion crop and how to minimize them by fertilizer and water management (Verma and Yadav), 115
Sunflower and lucerne and the measurement of total and osmotic potentials in their tissues using thermocouple psychrometers (Wright and Whitfield), 481
Swaziland's middleveld and the mineral status of soil, forage and cattle tissues there (Ogwang), 177
Systems, *see* Farm systems *and* Farming systems
Systems-problem solving research using a participatory method: rehabilitating marginal uplands in the Philippines (Lightfoot, de Guia Jr and Ocado), 301

Teas, Kenyan clonal black CTC, and the effects of geographical area of production on the composition of their volatile flavour compounds (Owour, Tsushida, Horita and Murai), 227
Technology development and farmer groups: experience from Botswana (Norman, Baker, Heinrich and Worman), 321
Technology development, farmers and on-farm research (Sumberg and Okali), 333
Temperature and moisture content of the soil and crop growth and yield as affected by intercropping maize with melon (*Colocynthis vulgaris*) (Olasantan), 67
Theory of Plant Breeding (The), by Oliver Mayo, reviewed by F. G. H. Lupton, 393
Thermocouple psychrometer and pressure chamber measurements of leaf water potential in peanuts compared (Wright, Rahmianna and Hatfield, P. M.), 355
Thermocouple psychrometers and their use to measure total and osmotic potentials in lucerne and sunflower tissues (Wright and Whitfield), 481
Tied ridges in the Sudan savannah of Burkina Faso and their soil physical properties (Hulugalle and Rodriguez), 375
Tropical Agriculturalists: Future Prospects, produced by the Tropical Agriculture Association and the British Council, reviewed by R. W. Radley, 394
Tropical Forest and its Environment, by K. A. Longman and J. Jehil, reviewed by N. W. Simmonds, 493
Tuber and root crops in the tropics and their storage – cassava, yam and edible aroids (Cooke, Rickard and Thompson), 457
Turkish wheat cultivars and their responses to vernalization and photoperiod (Terzioğlu), 237

Urea, ordinary, coated and nitrification inhibitor treated, as a source of nitrogen for maize (Prabhakaran Nair and Sharma), 477

Varietal mixtures in sugarcane and their performance (Kapur, Bhat and Tripathi), 163
Vernalization and photoperiod responses of some Turkish wheat cultivars (Terzioğlu), 237
Verzeichnis Landwirtschaftlicher und Gartnerischer Kulturpflanzen (Ohne Zierpflanzen), by R. Mansfield, reviewed by P. M. Smith, 130
Vigna radiata, *see* Mung Bean
Volatile flavour compounds in Kenyan clonal black CTC teas and the effects of geographical area of production on their composition (Owour, Tsushida, Horita and Murai), 227

Water and fertilizer management to minimize yield losses of sugarcane when grown with a wheat companion crop (Verma and Yadav), 115
Water balance of the root zone of a pigeonpea and rice intercropping system as affected by crop geometry (row proportions) (Jena and Misra), 385
Water potential in peanut leaves; a comparison of thermocouple psychrometer and pressure chamber measurements (Wright, Rahmianna and Hatfield), 355
Weeding frequency of okra (*Abelmoschus esculentus*) for optimum growth and yield (Iremiren), 247
Wheat and minimizing yield losses of sugarcane when grown with it by fertilizer and water management (Verma and Yadav), 115
Wheat and the responses of some Turkish cultivars to vernalization and photoperiod (Terzioğlu), 237
Wheat–potato systems in the north-western plains of India and the effects of different green manures and fodder crops on their yields and phosphorus needs (Sharma, Govindakrishnan, Singh and Sharma), 97

Workshop on the Caribbean Cooperative Rice Research Network. Proceedings of a Workshop held in the Dominican Republic, ed. by Federico Cuevas, reviewed by A. K. Thompson, 265

Yam, cassava and edible aroids – the storage of tropical root and tuber crops (Cooke, Rickard and Thompson), 457

Yield and evidence for its stability in selected landraces of bean (*Phaseolus vulgaris*) (Ayeh), 367

Yield and growth of okra (*Abelmoschus esculentus*) and optimum frequency of weeding (Iremiren), 247

Yield and growth of okra (*Abelmoschus esculentus*) as affected by leaf removal and their relevance to leaf harvesting patterns and pest damage (Olasantan), 449

Yield and growth of the crop and soil temperature and moisture content as affected by intercropping maize with melon (*Colocynthis vulgaris*) (Olasantan), 67

Yield differences between four genotypes of groundnut (*Arachis hypogaea*) in response to drought and their physiological basis. I. Dry matter production and water use (Matthews, Harris, Nageswara Rao, Williams and Wadia), 191; II. Solar radiation interception and leaf movement (Matthews, Harris, Williams and Nageswara Rao), 203; III. Developmental processes (Harris, Matthews, Nageswara Rao and Williams), 215

Yield losses of sugarcane when grown with a wheat companion crop and how to minimize them by fertilizer and water management (Verma and Yadav), 115

Yield of fibre in jute as affected by broadcast and line sowing, a reassessment (Palit, Bhattacharyya and Samanta), 471

Yield of rice and the growth and nitrogen fixation of *Azolla pinnata* as affected by phosphorus and carbofuran (Singh and Singh), 183

Yield stability of maize genotypes across international environments: full season tropical maize (Crossa, Westcott and Gonzalez), 253

Yield trends in oil palm as a result of different planting densities (Breure), 37

Yields and phosphorus needs of potato–wheat systems in the north-western plains of India as affected by different green manures and fodder crops (Sharma, Govindakrishnan, Singh and Sharma), 97

Yields of forage of five tropical grasses on an extremely sodic soil and the resultant soil amelioration long-term (Kumar), 89

Yields of lint, seed, protein and oil, and oil properties of cottonseed as affected by the concentration and time of application of the defoliant Harvade (Sawan, Hefni and Allam), 123

Zambia's Adaptive Research Planning team: an example of developing a partnership between farmers and scientists (Kean), 289

Zanzibar and Pemba and the causes of irregular clove production in these islands (Martin, Butler and Dabek), 105
